

MaPa Pneumatic

- Industrial vacuum cleaner
- Air intake pressure regulator with shut-off valve
- Energy saver to reduce air consumption under varying conditions of use
- Braked castor wheels in front
- Fixed rear wheels
- Max depression safety valve
- Accessory basket
- Air circulation reverser for automatic filter cleaning and for emptying of liquids from recovery tank
- 100 litre stainless steel tank with sight glass and hand wheel lowering device

The MaPa Pneumatic is a heavy duty air driven vacuum cleaner. This machine is suitable for heavy duty use in the mining, manufacturing, construction and engineering industries.

Operation is trouble free as the machine has no moving parts.

Also suitable for use in hazardous environments. Can be used in spark proof applications in conjunction with the correct tooling and hose.

Optional Accessories Available

INDUSTRIAL RANGE by IPC Soteco

The industrial range are heavy duty machines which include continuous duty operation.

We have single phase, three phase and air driven machines available.

These machines can be used in portable or fixed formats, for wet or dry suction of almost anything from fine dust, hazardous material, coolants, oils and many other such materials too numerous to mention.

The list of accessories is "never ending" and will depend on the type of job you are doing. Hoses, filters and accessories are available for suction of hot materials such as ash or even baking crumbs in hot oven areas and so on. Manual, pneumatic and electric filter shakers are available as well as hepa filters for more specialized applications.

Complete cleaning equipment solutions.....
and one company that brings it all together!

MaPa V600M

- Industrial vacuum cleaner
- 3 x 1200w by-pass motors
- Dust and liquid suction
- Anti-foam device
- Washable novates star shaped filter and conveyer cone
- Polycarbon pre-filter
- Crush proof, anti-oil and anti-static 4m rubber suction hose
- Rubber crevice tool
- Double elbow in aluminium
- Standard tooling also includes an aluminium tool cuff, floor tool and galvanised steel cuff

The V600M is suitable for vacuuming both solids and fine dust. The high air flows allows the operator to work quickly and efficiently.

A built in conveyor cone assists with the collection of both solids and fine dust in the vacuum hopper and the external filter shaker helps to ensure maximum efficiency during operation.

Accessories supplied with Vacuum

MaPa 200TS3

- Industrial vacuum cleaner
- Manual filter shaker
- Electrical socket for power accessory. Max 1000W
- 3 x 3 stage fan motors
- 100 litre stainless steel tank with sight glass
- Thermal overload protection
- Braked castor wheels in front
- Fixed rear wheels
- Tank releasing handle
- Accessory basket

The MaPa 200TS3 is suitable for non-continuous use in engineering workshops, bakeries, carpentry shops, pharmaceutical industries.

The motorhead is constructed of steel and has a built-in filter shaker and vacuum gauge which allows the operator to monitor and control the filter status. The vacuum tanks are manufactured from 1mm stainless steel. A star shaped polyester filter provides a huge filtering surface.

Optional Accessories Available

MaPa 350S

- Industrial vacuum cleaner
- Manual lateral filter shaker
- Tangential inlet Ø70mm
- 100 litre stainless steel tank with sight glass
- Braked castor wheels in front
- Fixed rear wheels
- Tank releasing handle
- Max depression safety valve
- Accessory basket
- Muffler

The MaPa 350S is suitable for continuous use. This machine has a diecast aluminium turbine with a simplified exhaust system making it easy to use.

The side mounted filter shaker makes the 350S suitable for applications where there is fine dust, metal shavings, etc.

Suitable for use in mechanical, ceramic, motor and woodworking industries.
