HOME - Eco Vac

PROFESSIONAL - Eco Vac

- (1) Power On/Off.
- (2) Triple Filtration.
- (3) Easy to operate robust tank clips.
- (4) 5 Plastic Castor Wheels.

A quiet, powerful and robust vacuum cleaner, suitable for dry applications in the cleaning of hard floors, carpets and upholstery.

Ideal for offices, hospitals, retirement villages and homes, where noise and dust suppression is a necessity.

*The Eco has a triple filtration system which includes a hepa filter. This filter will trap up to 99.9% of particulates of 0.3 microns.

Normal vacuum cleaners would simply re-circulate these particulates. By reducing or eliminating these particulates the Eco will make cleaner air, reducing problems for allergy sufferers.

The washable polyester filter is easy to clean.
